Diigo How do you say it?: Dee'go

What is it?
- [Online bookmarking](#) (web site links are available anywhere); share with others
- Highlight text on a web page you've saved
- Add a comment to a block of text or add a sticky note to the web page; save with a web page
- Take a "snapshot" of part or all of a web page (saved as html or screenshot/pic)
  - You can add text, arrows, circles and rectangles to your snapshot
- The example below is a web page snapshot that had a bit of red bold text and a comment (the number 1 in a box) next to yellow highlighted text
  - In the snapshot, I added in blue text "Add text to a screen shot", a blue arrow, plus a purple rectangle

How do you get it? from diigo.com
- Install the Toolbar or add the diigolet (bookmarklet) to your browser

How is it like other bookmarking tools?
- You can associate tags with your bookmarks (to use to search for later)
- You can create lists of bookmarks that you want to group together, like a list of bookmarks called "Web 2.0 Tips"
- You can share your bookmarks with other people
- You can "follow" people

It works with various web browsers and apps: Check out [Diigo Tools](#)

How is it different from other bookmarking tools?
- You can import and/or synchronize all your bookmarks with delicious bookmarks
- You can highlight, comment and take snapshots of web sites

What web services does it have?
- Import/export bookmarks and send bookmarks to a blog
