

## To embed a myBrainshark presentation on a Lessons page in Sakai

- In myBrainshark, click **Embed/Link**, then click the **Embed Code** tab.
- You'll see a complicated-looking embed code in a box. In this code, carefully highlight and copy the web address as shown below.

Links **Embed Code** QR Code

< > Embed this presentation using this HTML:

To embed in Sakai, copy only the web link (without quotes) from the embed code. In a Sakai Lesson, click **Add Multimedia** and paste the address.

Size: 345x230 Size: 440x283 Size: 555x348

```
<div><iframe src="http://www.brainshark.com/brainshark/vu/view.asp?pi=619019772&dm=58&pause=1&nrs=1&appKey=77" frameborder="0" width="555" height="348" scrolling="no" style="border:1px solid #999999"></iframe></div>
```

Use <object> embed code **Don't check this box!**

- In Sakai, go to the page in Lessons where you want to embed the presentation.
- Click **Add Multimedia** at the top.
- In the URL field, paste the address copied from Brainshark's embed code.

**Add Multimedia** ✕

You may supply a file to be uploaded, specify a URL where the item is available, or choose a file that has already been uploaded.
