Enabling the "Help with "Life Stuff" Drop-Down Menu in Sakai

Creating a drop-down menu in Sakai requires you to complete several steps:

- (if you already use the Lessons tool for instruction) add a 2nd Lessons button to the menu and change its name,
- create multiple subpages on the new Lessons page, and then
- enable the Lessons subpage navigation option.

This handout will walk you through each step.

To Add a 2nd Lessons Button to the Menu

1. In your course site, click **Site Info** (on the course menu).
2. Select the **Manage Tools** tab.
3. Scroll down and place a **check** in the empty box next to **Lessons**.

4. Scroll down and click the **Continue** button.
5. The Customize tool screen appears. Type a **Title** for the button, for example *Help with Life Stuff*.
6. Click the **Continue** button. Then click **Finish**.
7. The new button appears on the menu.
   You can change the location of the button on the menu, if you'd like, by clicking Site Info > Tool Order.
