LMS Evaluation Criteria   **System Evaluated:** _____

Usability o Is student, faculty, and learning friendly o Works for students and instructors across DTCC's educational continuum o Conforms to web accessibility standards	
Content conversion and creation o Workable way exists to convert current content to new platform o Offers options for instructors to post content in a variety of formats o Accepts content from sources such as publishers and the NCCCS	
Interactivity and assessment o Provides tools for students to contribute content, interact with peers/instructors, and engage in collaborative learning o Provides ways for instructors to build assessments, monitor student progress, calculate/communicate grades, and provide student feedback	

Interoperability ○ Can integrate with existing systems such as Colleague ○ Has the potential to integrate with future student authentication and/or portal systems	
Scalability and sustainability ○ Feasible and sustainable in terms of cost, support, and stability ○ Can expand to meet future needs
